**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sadao Kinashi on 10/29/03.

The application has been amended as follows:

Claim 4 (twice amended) A coating layer agent composition comprising: acetylated monoglycerides, wherein said composition is in the form of a powder mixed with and adhered to silicon dioxide at a concentration range of 100-250 weight % of acetylated monoglycerides to silicon dioxide.

In claim 6, line 1, delete "or 5".

Claim 11 (amended) A frozen food to be microwave-heated comprising:

A food substrate and

a first coating and/or sheet covering said food substrate,

wherein a second coating of a composition [containing] consisting essentially of acetylated monoglycerides is interposed between said food substrate and said first coating and/or sheet, and

said frozen food is freeze-preserved after cooking by heating; with the proviso that said second coating of a composition consisting essentially of acetylated monoglycerides is optionally in the form of a powder mixed with and adhered to silicon dioxide.

Claims 5, 7, 13 and 16 have been canceled.

2. The following is an examiner's statement of reasons for allowance:

Independent claim 4 was amended to incorporate the concentration limitation of claim 5. As such, twice amended independent claim 4 is deemed to be free of all prior-art rejections since none of the previously applied prior-art references are deemed to teach or suggest a silicon dioxide substrate that is itself coated with a composition containing acetylated monoglycerides at a concentration range of 100 to 250 weight % of acetylated monoglycerides to silicon dioxide substrate.

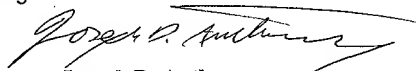

Independent claim 11 has been amended to limit the second coating composition to a composition that consist essentially of acetylated monoglycerides, wherein the second coating composition is optionally in the form of a powder mixed with and adhered to a silicon dioxide substrate. It is held by the examiner that by replacing the open claim language of "comprising" with --consisting essentially of-- the previously

made prior-art rejections are overcome because all of the coating compositions disclosed and suggested by said prior-art require other components that are now excluded by the more restrictive claim language.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
